The illustration below depicts a typical wiring dressing of a Heavy Duty Zone Box in a Class B detection circuit of a fire alarm system using Protectowire as the detector. This zone box is furnished with quick connect terminals which makes it possible to fasten the detector directly to the terminals. All bends in the Protectowire should have a radius of at least 2.5in (6.4cm). For further information on detector splicing see diagram provided with splicing sleeves and in installation guide for Protectowire.
