

250 PSI WET BARREL FIRE HYDRANT, FLANGED END

MODEL: SFL-WBH-250-F

GENERAL DESCRIPTION

Sanflo Wet Barrel Hydrants (WBH) provide a connection point for firefighters to tap into a water supply. WBH's are used in climates where freezing is not an issue. The simple construction involves the mechanical parts of a WBH being above ground, with a main valve to prevent any foreign debris from entering the hydrant. There is water in the barrel and hydrant at all times. WBH's can be easily raised or lowered during new construction, allowing proper height to be achieved without expensive modifications.

BASE SIZE: 6" **HOSE OUTLETS:** 2.5" x 2 **PUMPER OUTLET:** 4.5"
